- In order to administer any women's health program, a potential provider must first be an approved Texas Medicaid provider. For the Texas Women's Health Program, the provider must sign an affiliate affirmation form prior to becoming a provider for the program. The Family Planning, BCCS, and EPHC programs select providers based on the results of a competitive Request for proposal (RFP). The providers are located throughout the state and represent every major geographical location.

Number of Providers						
	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015

### Interconception Care

- Meeting a client's health care needs that directly impact her ability to have a future, healthier pregnancy.
- For instance, if a woman has diabetes, she needs her healthcare needs met so if she has another baby, the pregnancy and birth are not high risk and less expensive.

### Chronic Disease (Screening & Treatment)

- Diabetes
- Hypertension
- High Cholesterol/Heart Disease
